

Waste Management Policy Statement

At We Clear Junk Ltd, we are committed to promoting sustainable waste management practices and minimising our environmental impact. We strive to increase diversion from landfill, encourage reuse, prioritise waste separation for recycling, and adhere to best practices in waste collection. Furthermore, we aim to improve the transparency of our operations and collaborate with clients to enhance the collection and analysis of waste data. This policy outlines our commitments and principles:

1. Diversion from Landfill:

- a. We will prioritise waste diversion from landfill by promoting recycling, reuse, and other sustainable waste management practices.
- b. Our goal is to minimise the amount of waste that ends up in landfills and maximise the recovery of valuable resources through appropriate collection and sorting methods.

2. Reuse and Circular Economy:

- a. We will actively promote reuse initiatives by identifying items with potential value and facilitating their reuse through partnerships with local charities, organisations, and other appropriate channels.
- b. We will encourage clients to consider donation or reuse options for items that can be repurposed instead of being disposed of as waste.

3. Waste Separation for Recycling:

- a. We will implement efficient waste separation practices to maximise the recycling potential of different materials, including but not limited to paper, plastics, metals, glass, and electronic waste.
- b. Our collection teams will be trained to encourage clients to segregate waste at the source and provide clear instructions on proper waste separation.

4. Best Practices in Waste Collection:

- a. We will adhere to industry best practices for waste collection, transportation, and handling to ensure the safety of our employees, clients, and the public.
- b. Regular maintenance and inspection of our collection vehicles and equipment will be conducted to minimise leaks, spills, and emissions.

5. Environmental Impact Reduction:

- a. We are committed to reducing our environmental impact by minimising carbon emissions, energy consumption, and water usage in our operations.
- b. We will explore opportunities to utilise alternative fuels, energy-efficient vehicles, and implement other sustainable practices to reduce our carbon footprint.

6. Transparency and Waste Data:

- a. We will work with clients to improve the transparency and accuracy of waste data collection and reporting.
- b. We will provide clients with regular reports on their waste management performance, including waste volumes, diversion rates, and other relevant metrics to help identify opportunities for improvement.

7. Compliance and Continuous Improvement:

- a. We will comply with all relevant waste management regulations, permits, and licenses.

b. We are committed to ongoing monitoring, evaluation, and improvement of our waste management practices, seeking innovative solutions to enhance efficiency, sustainability, and customer satisfaction.

This Waste Management Policy reflects our dedication to responsible waste management and sustainable practices. We Clear Junk Ltd strives to be a leader in the industry, contributing to a cleaner environment and a more circular economy.
